

**NEW!**

## Software Development for Commercial Websites: Learn to code in PHP, MySQL, jQuery, HTML5 and CSS3

Get the practical knowledge you need to achieve your professional goals.

### Program Description

This 26 session, professional certification program, is designed to teach 'in demand' web development skills including PHP, MySQL, jQuery, HTML5 and CSS3. Geared towards working professionals, the 400+ hours of training will be divided equally between classroom instruction and assigned, web based 'homework'.

The non-credit Web Development Certificate program is an ideal professional development option for those seeking to become more competitive in the job market or make a career change. Students in this program will also have the opportunity to create a published Web Portfolio for their professional use.

### Payment Information

Cost: \$ 3500

### Admission Requirements

GED or High School Diploma

Prospective students will demonstrate competency in computer literacy, math, logic and reasoning.

### Graduates will have the skills to:

- ✓ Develop, debug and maintain code on commercial websites
- ✓ Design, query and optimize relational databases
- ✓ Utilize version control systems and cloud computing resources

### Job Description

Multiple employment and career outcomes are possible such as Website Developer, QA Specialist and Web Designer. Job duties may range from building and maintaining websites to testing website installations.

### Employment Outlook

2020 employment forecasts indicate there will be a 22% growth for software computer programmers. Salary Expectations - \$42K+ for an entry level software developer.

### Program Schedule - LIMITED SEATS AVAILABLE

Days: Tuesday & Thursday, January 21 - April 19

Time: 6:00 PM - 10:00 PM - Room: N103

Instructor: Colin Ryan
